**Tom Campbell has a 20 year record supporting higher taxes...**

Dear Californian,

Washington is out of control spending money it doesn't have, and Tom Campbell's positions when it comes to higher taxes and wasteful spending is one of the problems.

As California's state budget director, he crafted the largest one year increase in general fund state spending ever... eventually creating our \$20 billion budget deficit and putting us even deeper in debt.

But that's not all... in the midst of California's worst recession when over one million people lost their jobs, Tom Campbell repeatedly supported new and higher taxes... higher sales taxes, higher income taxes, higher gasoline taxes, a new carbon tax and even extending the sales tax to services you and I use every day.

Tom Campbell even supported the largest state tax increase in California history, the 2009 Proposition 1A effort to raise \$16 billion in new and higher taxes. Fortunately, California voters agreed with us and defeated this massive tax increase by a 2 to 1 margin.

Please go to [www.TomIsTheTaxMan.com](http://www.TomIsTheTaxMan.com) and sign the American Future Fund petition urging Tom Campbell to oppose new and higher taxes, and wasteful spending. For more information on Howard Jarvis Taxpayers Association, go to [www.hjta.org](http://www.hjta.org).
